

MOHAMMED ZAHID

Web Developer · Data Analyst

✉ mdzahidzahu@gmail.com | ☎ (+91) 9353442297 | github.com/Zahid-5160 | linkedin.com/in/Mohd-Zahid

PROFESSIONAL SUMMARY

Versatile Full-Stack Web Developer and Data Analyst with 11 months of professional experience. Skilled in end-to-end web application development and data-driven decision-making — proficient in JavaScript (ES6+), React.js, Python and its libraries, apart from work experience, have learned SQL and MongoDB. Bridges front-end engineering with database management, ETL pipelines, and exploratory data analysis (EDA) to extract actionable insights and drive measurable business outcomes.

TECHNICAL SKILLS

Web Dev:	JavaScript (ES6+), HTML5, CSS3, React.js, Flask, REST API, Django, SEO.
Data & Analytics:	Python, Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA).
Databases:	SQLite, MongoDB, — Schema Design, Query Optimisation, Aggregation Pipelines, Indexing.
DBMS Concepts:	Normalisation (1NF–3NF), ACID Transactions, ETL Pipelines, ER Modelling, Data Wrangling.
Tools:	GitHub, VS Code, MongoDB Compass, PyCharm, WordPress, Elementor.

PROFESSIONAL EXPERIENCE

Arsuma Solutions | Web Developer (Remote) — Noida Jan 2025 – Nov 2025

- Developed and maintained production-grade WordPress sites using CustomJS (ES6+) and Custom CSS; integrated third-party Plugins, REST APIs enabling real-time dynamic data rendering without page reload.
- Debugged and resolved front-end and back-end issues, improving overall site stability and user engagement; applied SEO best practices (Structured data, performance tweaks) to boost search visibility.

KEY PROJECTS

Telcom Customer Churn Prediction System — Pandas, NumPy, Matplotlib, Seaborn,

- Conducted Exploratory Data Analysis (EDA) on telecom churn data to identify customer retention patterns and churn-related factors.
- Performed data cleaning, handling of missing values, and statistical analysis using Pandas and NumPy.
- Built insightful visualisations using Matplotlib and Seaborn to analyse customer demographics, subscription behaviour, and service usage trends.

ChatGPT API Clone — Conversational AI Web App — JavaScript, Flask, Python, LLM API, MongoDB

- Built a full-stack AI chat application integrating LLM APIs via a Flask back-end, delivering real-time responses with multi-turn context management and prompt engineering.
- Designed a responsive async front-end (fetch/async-await) and logged all conversations to MongoDB, enabling session retrieval and usage analytics via aggregation pipelines.

Real Estate Website | Silver Heights — WordPress, Elementor, Custom CSS, CustomJS,

- Developed a fully responsive real estate website with dynamic property listing pages, filters, and user-friendly navigation to improve property discovery across devices.
- Implemented contact forms and lead capture features; optimised performance and mobile responsiveness for a smooth cross-device experience.

Hospital Management System — DBMS Design — SQLite, Django, ER Modelling, Stored Procedures,

- Designed a fully normalised relational schema with stored procedures for billing and triggers for appointment conflict detection, enforcing data integrity at the database layer.
- Wrote SQL reports using window functions (RANK, ROW_NUMBER, LAG) and CTEs for doctor workload, bed occupancy, and revenue-by-department analytics.

EDUCATION

B.E. in Computer Science

City Engineering College, Karnataka (7.6 CGPA) | 2025

Higher Secondary (XII) KSEEB

Falcon PU College | 2020

ACHIEVEMENT

- 1st Place — Battle of Science (B.E. First Year): 2022**

Built a fully functional college event website using React.js & TailwindCSS; awarded a cash prize by the faculty panel.
